The following is an examiner's statement of reasons for allowance: US 4,124,466 (Morrey) discloses a method for enhancing a chemical reaction by increasing the population of a high vibrational energy state of a reactant molecule above its population at thermal equilibrium by directing onto the molecule a beam of radiant energy from a laser having a combination of frequency and intensity selected to pump the selected energy state. However there is no teaching, disclosure or suggestion in Morrey to employ the process to excite nitrogen and to react the excited nitrogen with hydrogen or water to produce hydrazine. Nor would there be any motivation from the prior art to do so, particularly in view of page 7, line 10 to page 8, line 6 of applicant's specification, which states that one cannot utilize an arbitrary excitation of nitrogen for the nitrogen to interact with hydrogen to form hydrazine, but that only a specific excitation can accomplish the desired goal of having good efficiency and practical application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone
